

Bonito — The Operating System for Enterprise AI

Enterprise AI adoption is hitting an inflection point. Bonito gives organizations the unified control plane to adopt faster, operate cheaper, and turn AI into a real competitive advantage – across every cloud.

84% Cost Reduction

Intelligent multi-cloud routing cuts AI operating costs dramatically

Governed AI Agents

Every department gets an AI agent that knows your business

Live in Production

Available now at getbonito.com – 18 phases shipped

SEED / PRE-SERIES A

SEEKING \$1M-\$1.5M

AI's \$391B Problem: Everyone's Buying It. Nobody Can Run It.

Hyperscalers poured \$200B+ into AI infrastructure in 2025. Enterprises – the ones expected to generate returns – are stuck in operational chaos before they can even start on agents.

Multi-Cloud Fragmentation

87% of enterprises use 2+ cloud providers (Flexera). Each AI service brings its own console, credentials, billing, and compliance model – no unified view.

Compliance Paralysis

SOC-2, HIPAA, GDPR, and the EU AI Act turn every new AI deployment into a 6-12 week procurement cycle. Platform teams become bottlenecks.

Cost Blindness

AI spend is growing 30%+ YoY, but most enterprises can't attribute costs to teams, projects, or models across providers. No per-key attribution. No forecasting.

Agent Chaos Incoming

Every department wants its own AI assistant. No governance framework exists. Ungoverned agents accessing company data is a CISO's worst nightmare.

📌 The \$391B AI market (Grand View Research, 2025) – projected to hit \$3.5T by 2033 – is bottlenecked by **operations**, not technology.

2026 Is the Year Enterprise AI Needs an Operations Layer — and an Agent Layer

Every major technology wave follows the same pattern. Cloud had its inflection moment – AWS launched in 2006, and Terraform, Datadog, and CloudHealth emerged to make it operable. AI is following the same arc, but 10x faster. We are at the operations *and* agent inflection simultaneously.

1**Innovation**

New capabilities emerge – GPT-4, Claude, Gemini

2**Adoption**

Enterprises start buying AI services at scale

3**Operations ← Here**

Tooling to run AI at scale – control planes, governance, cost management

4**Agents ← And Here**

Autonomous AI workers for every department

\$15M**Portkey Series A**

Elevation Capital + Lightspeed – validates the "unified AI control plane" category

\$94B**Market by 2030**

AI platform market (MarketsandMarkets, 38.9% CAGR from \$18.2B in 2025)

500B+**Tokens/Day**

Portkey's daily token volume – proving enterprises route serious money through control planes

Bonito: One Platform. Every AI Provider. Full Control. Governed Agents.

Bonito is a unified control plane for enterprise AI – combining operations and agents on the same governed foundation. No patchwork of tools. No separate compliance workflows. One product from onboarding to autonomous agents.

Control Plane — Live in Production

Connect

Guided onboarding with IaC generation (Terraform, Pulumi, CloudFormation, Bicep). Least-privilege credentials. 15-minute time-to-value.

Govern

Real-time compliance checks against SOC-2, HIPAA, GDPR, ISO 27001. SAML SSO, RBAC, and full audit logging.

Route

OpenAI-compatible API gateway with intelligent routing – cost-optimized, latency-optimized, failover. One endpoint, any model.

Optimize

Unified cost aggregation across AWS/Azure/GCP. Per-team, per-key attribution. Forecasting and model recommendations.

Bonobot — Enterprise AI Agents

Per-Department Agents

Each team gets an AI agent scoped to their knowledge, tools, and budget – HR, Finance, Engineering, Sales, and more.

Resource Connectors

Governed access to enterprise data: S3, SharePoint, Google Drive, GitHub, databases. Scoped, audited, revocable.

Budget Enforcement

Hard spend caps per agent. Automatic stops before overspend. No surprise invoices.

Visual Canvas

Node-graph dashboard (n8n-style) for managing agents, triggers, and connections. No engineering required.

Live at getbonito.com — 18 Phases Shipped, Production-Validated

Bonito is not a prototype or mockup. It is a production-grade platform with real multi-cloud integrations, a working agent engine, and a validated enterprise savings case study.

18

Dev Phases Complete

End-to-end platform shipped across 18 development milestones

381

Models Cataloged

241 active, 12 deployed across AWS Bedrock, Azure AI Foundry, and GCP Vertex AI

43/44

E2E Tests Passing

Automated test suite with 10/10 concurrent stress test pass – zero session leakage

290ms

RAG Avg Latency

AI Context (RAG) delivers 10/10 search accuracy with 0.634 average relevance score

Case Study: Meridian Technologies

Mid-size fintech, 500 employees – unified 3 cloud AI providers into a single Bonito control plane.

\$2.25M

Projected annual savings (84% cost reduction)

37.5:1

ROI at 50,000 requests/day

Key Features Shipped

- **3 Enterprise Core Features Shipped** - "Persistent memory, scheduled execution, approval queues - production-tested, zero errors"
- SAML SSO with JIT provisioning and break-glass admin
- AI Context (RAG) with 768-dim vector search and cross-cloud injection
- Bonobot v1 enterprise AI agent engine with visual canvas dashboard
- RBAC with managed and custom roles, resource-scoped permissions
- Hierarchical logging with Datadog, Splunk, and CloudWatch integrations
- Python CLI v0.2.0 for terminal-based management

Land with the Platform. Expand with Agents. Revenue Compounds Per Department.

Bonito uses a land-and-expand model designed for enterprise growth. The platform gets us in the door; agents scale revenue without adding seats. Every department that adopts Bonobot becomes a recurring revenue line.

Free — \$0/mo

Individual developers and POC. Dashboard + 1 cloud provider.
Converts to paid through bottom-up PLG.

Pro — \$499/mo

Platform teams (5-50 devs). Unlimited providers, AI gateway, AI Context (RAG), and compliance checks.

Enterprise — \$5-25K/mo

Mid-market (50-500 employees). SSO/SAML, RBAC, dedicated support, and SLA guarantees.

Scale — \$50-100K+/yr

Large enterprise. Custom deployment, VPC gateway, volume pricing, and dedicated success team.

Bonobot Agent Add-On (Pro+)

- **Hosted** (Bonito infra): \$349/mo per agent
- **VPC** (Customer infra): \$599/mo per agent
- 15% volume discount at 5+ agents; 25% at 10+

Revenue Scenarios

- Small team: Pro + 3 agents = **\$18,500/yr**
- Mid-size org: Enterprise + 8 VPC agents = **\$84,900/yr**
- Large enterprise: Scale + 20 VPC agents = **\$203,800/yr**

At 500 customers averaging \$8K/month = **\$48M ARR**

MARKET SIZE

\$94B AI Platform Market by 2030. Bonito Sits at the Intersection of Operations and Agents.

TAM

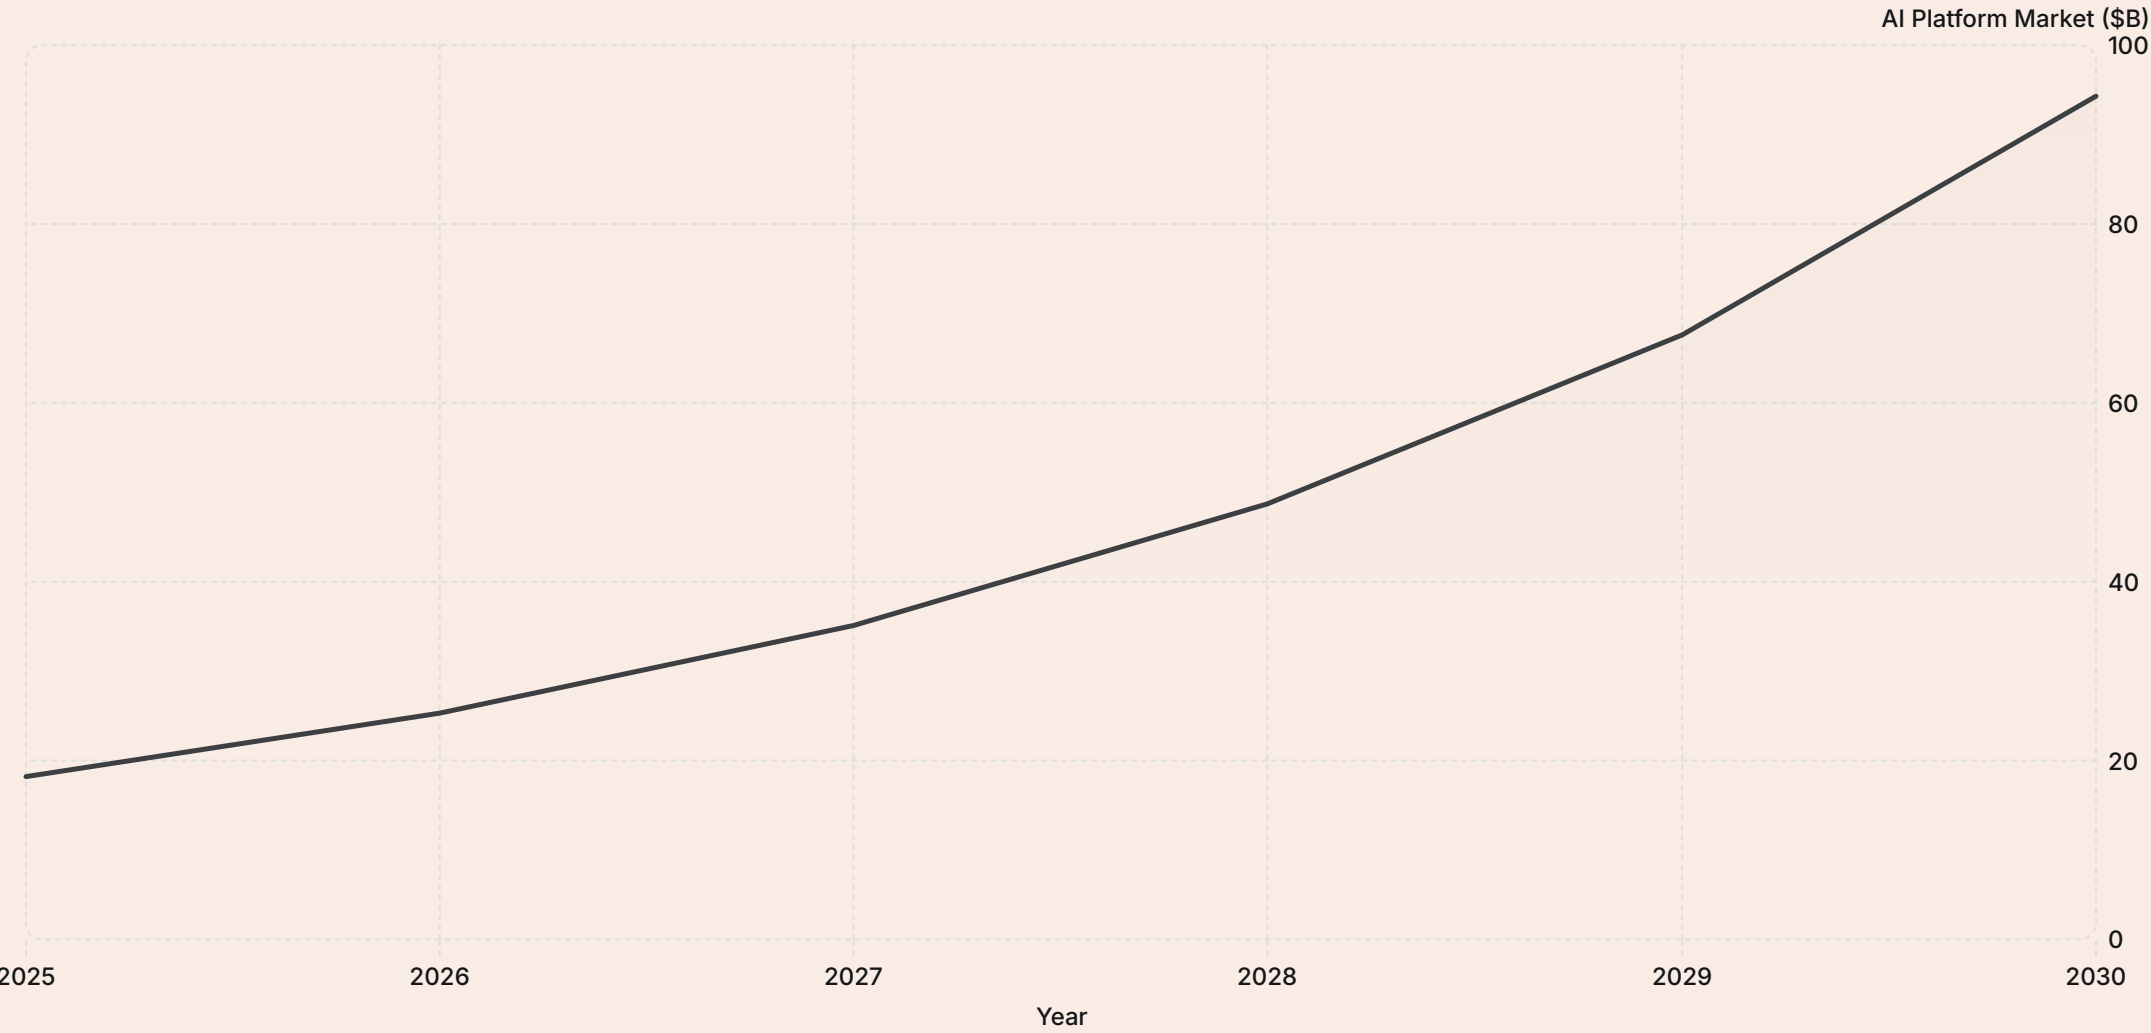

\$94.3B by 2030 – AI platform market (MarketsandMarkets, 38.9% CAGR from \$18.2B in 2025)

SAM

\$15–25B – AI operations, management, and agent tooling for multi-cloud enterprises by 2028

SOM

\$200M – 2,000 enterprise customers at \$100K average annual contract value (Year 3–5)

North America holds 35.5% revenue share – Bonito's initial market. Operations captured 20.4% of total AI revenue in 2025 – the largest single AI function. EU AI Act enforcement in 2026 makes governance **mandatory**, accelerating platform adoption across every regulated industry.

Honest About Competition. Clear About Differentiation. Nobody Does What We Do.

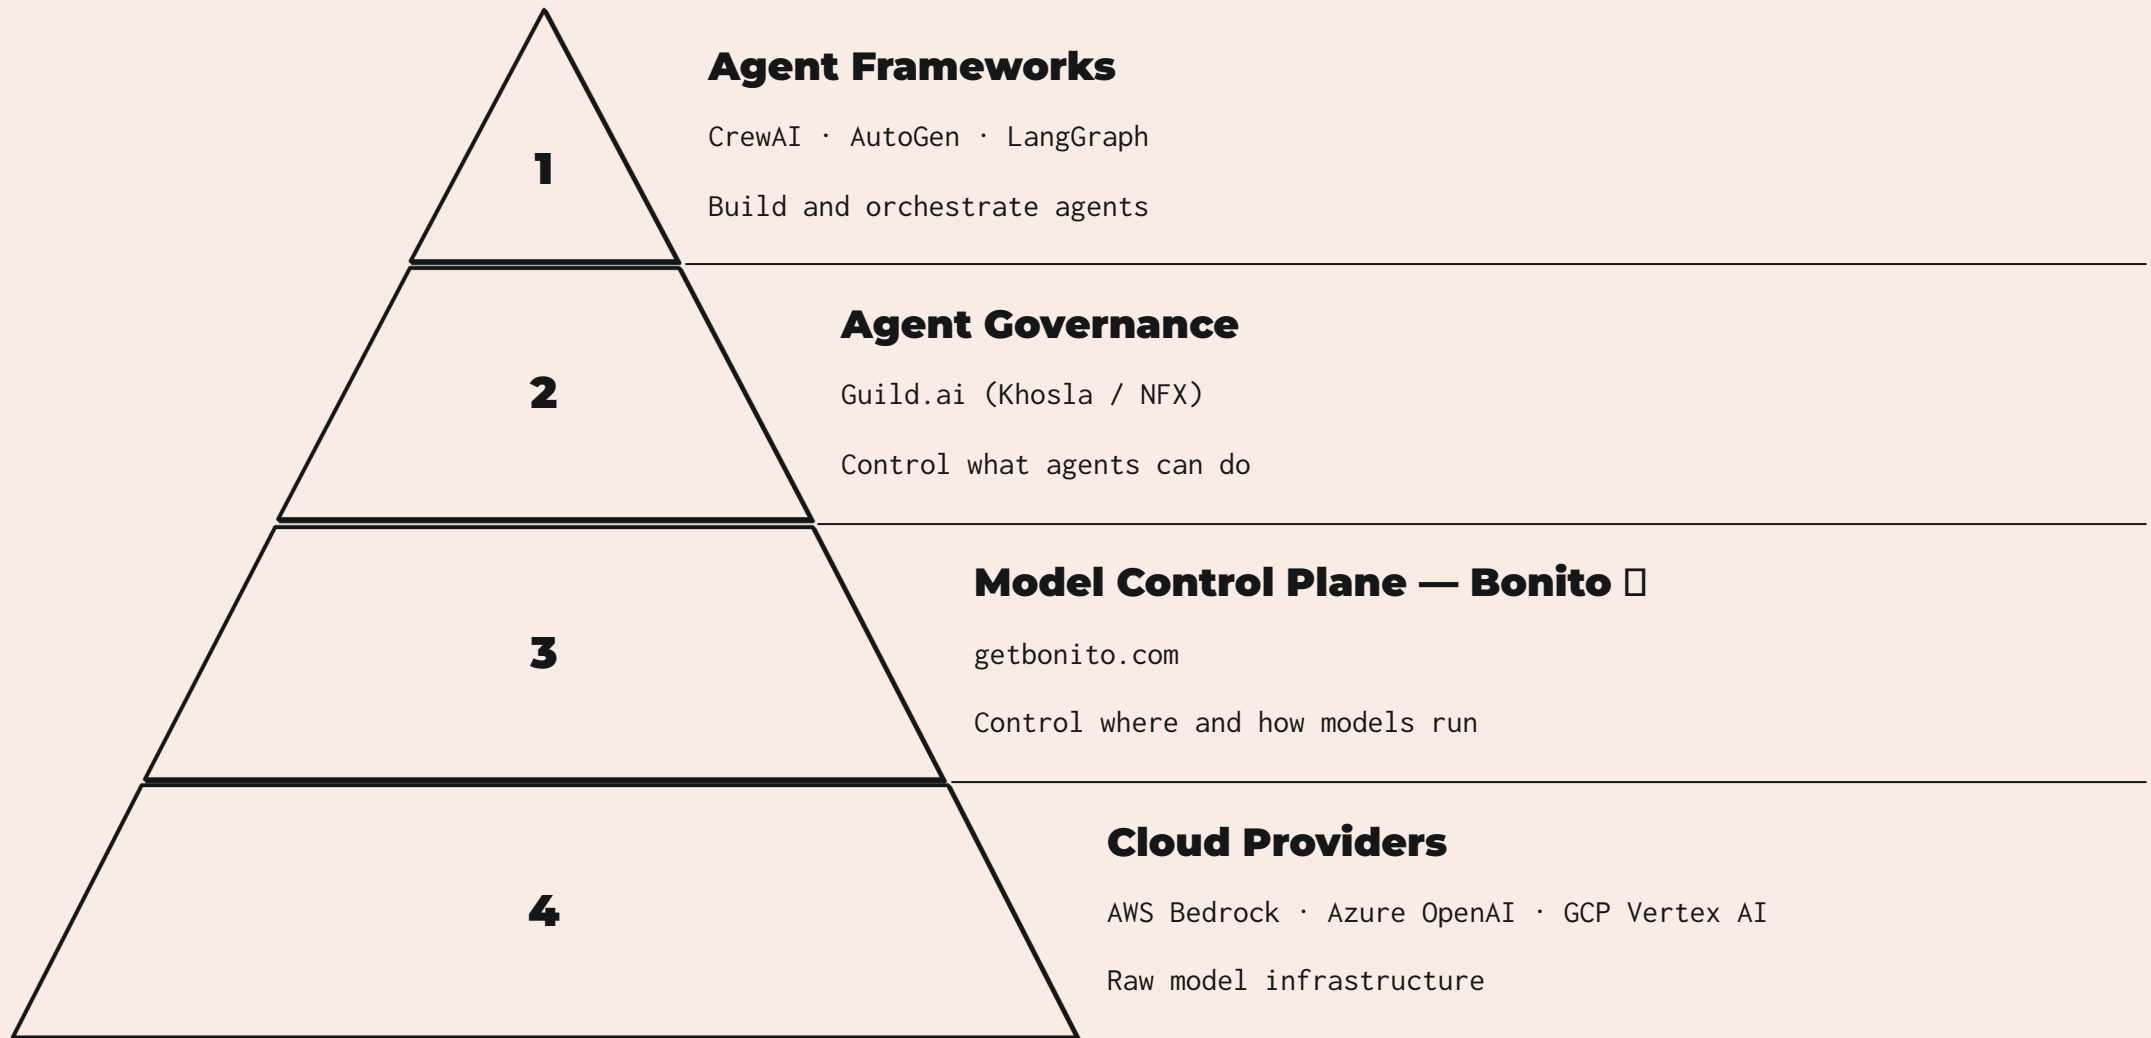

The competitive field is real and well-funded – but fragmented. Competitors are either proxy layers or observability tools. Bonito is the only platform that handles the full lifecycle: onboarding → IaC → governance → RAG → routing → agents → cost optimization – in one integrated product.

Capability	Bonito	Guild.ai	Portkey	LiteLLM	Helicone	Kong/CF
AI Gateway	✓	✗	✓	✓	✗	✓
Compliance/RBAC	✓	✓	Partial	✗	✗	Partial
IaC Onboarding	✓	✗	✗	✗	✗	✗
RAG / AI Context	✓	✗	✗	✗	✗	✗
Intelligent Routing	✓	✗	✓	✓	✗	✓
Governed Agents	✓	✓	✗	✗	✗	✗
Multi-Cloud Costs	✓	✗	Partial	✗	✓	✗
Agent Memory	✓	✗	✗	✗	✗	✗

- 📌 **Their honest edge:** Provider breadth (Portkey 60+, LiteLLM 100+ vs. our 3), scale proof, and funding. We are closing the provider gap fast. **Our edge that cannot be copied quickly:** Knowledge layer, governed agents with resource connectors, and IaC-driven onboarding – all shipped and in production.

Where Bonito Sits in the Enterprise AI Stack

The enterprise AI stack is forming in layers. Agent frameworks handle orchestration. Governance platforms handle oversight. Bonito handles the infrastructure underneath both – where models actually run, route, and cost money.

📌 Guild and Bonito are complementary layers. You can't govern what you can't route.

Product-Led Growth + Agent-Led Expansion. Two Motions. One Flywheel.

GTM Motion

→ **PLG Bottom-Up**

Free tier → developers try it → bring it to the platform team → Pro/Enterprise upsell. Zero sales friction to start.

→ **Agent-Led Expansion**

1 department adopts Bonobot → proves value → every department wants one → revenue compounds per customer, not per seat.

→ **Enterprise Direct**

Canadian mid-market first (heavy Azure/Copilot adoption), then US expansion. Channel partners and MSPs resell as part of AI adoption packages.

12-Month Milestones

Q3 2026

First 10 paying teams (Pro tier), 3 Bonobot design partners, SOC-2 Type I certification started

Q1 2027

Gateway metering live, 20+ active agents, \$100K+ ARR achieved

Q4 2026

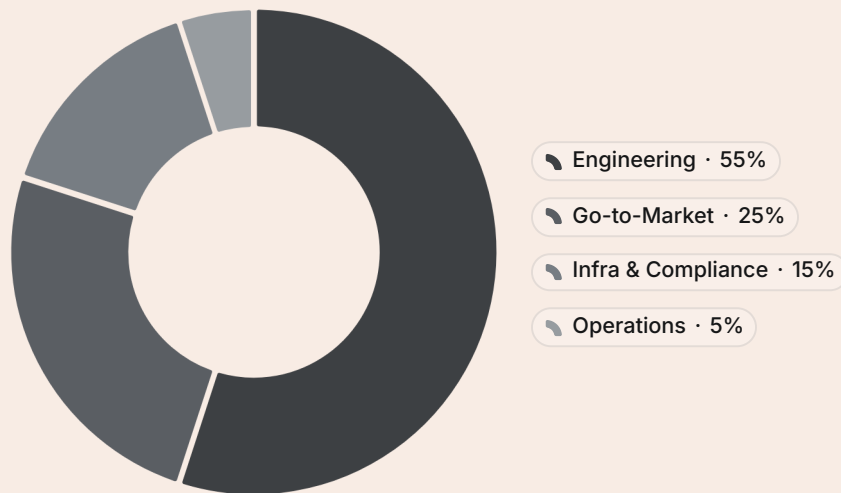

50 teams, first Enterprise deal closed, 5+ cloud providers, Bonobot GA launch

Q2 2027

200+ teams, 50+ deployed agents, \$500K ARR, Series A positioning initiated

Raising \$1M–\$1.5M Seed to Reach \$500K ARR in 12 Months

Use of Funds

Why Bet on Us

Shabari — Builder & Domain Expert

Software architect at FIS Global (enterprise fintech). Knows the buyer, the compliance requirements, and how enterprise procurement works. Built the entire production platform in 3 weeks – frontend, backend, infrastructure, and IaC.

Not Slideware — A Production Platform

18 development phases complete. Real multi-cloud integrations. Working AI agent engine. 43/44 automated E2E tests passing. \$2.25M savings case study validated.

Capital Efficient by Design

\$1M delivers 18-24 months of runway with a lean team – enough to reach \$500K ARR and position confidently for Series A.

- Also seeking: **Technical co-founder** with distributed systems or AI infrastructure background to accelerate provider integrations and agent infrastructure.

AI Needs an Operating System. We Built One. It's Live. Now We're Adding Agents.

Already Built

18 phases shipped, 43/44 E2E tests passing, 3 clouds live, \$2.25M savings case study validated. Not slideware.

AI Context Is the Moat

Centralized RAG knowledge that any model on any cloud can access. **Sub-300ms semantic search**. Zero competitors have this.

Agents Are the Multiplier

Platform gets us in the door at \$499/mo. Agents expand to every department at \$349-599/mo each. Natural land-and-expand.

Timing Is Perfect

EU AI Act enforcement in 2026 makes governance mandatory. Agent demand is exploding. Portkey just raised \$15M for a gateway – we have a gateway AND governance AND RAG AND agents.

"Connect your clouds. Know your costs. Give every team an AI that actually knows your business."
